Jean Naude

Machine Learning Engineer at Spatialedge (Pty) Ltd

Stellenbosch, Western Cape, South Africa

Summary

I have done extensive work in the Machine Learning Engineering space, which I consider to be the intersection between Data Science and Machine Learning Operations.

I have 4 years of working experience developing, improving, and deploying machine learning models in production in the retail domain. I'm passionate about solving complex problems with a strong desire to get things done in as lean a way as possible.

My strength lies in getting to production quickly with observable, usable results that facilitate business decision-making.

Experience

Spatialedge (Pty) Ltd

Machine Learning Engineer

June 2021 - Present (4 years 1 month)

Stellenbosch, Western Cape, South Africa

Education

ESIEE PARIS

International Masters in Computer Science (Intelligent Systems), Machine Learning

2019 - 2021

Pearson Institute

Bachelor of Science in Information Technology

2015 - 2018

Tech Stack

- | | | |
|----------------|-----------|--------------|
| • Python | • Bash | • Kubernetes |
| • Pytorch | • Git | • Terraform |
| • Scikit Learn | • Docker | • Helm |
| • C++ | • CI/CD | • React |
| • C | • GCP | • TypeScript |
| • SQL | • Airflow | • Redis DB |
| • Big Query | | • Tensorflow |
