SUMMARY

Senior Machine Learning Engineer with 4 years of experience delivering production-level ML models for major retail and financial clients. Co-founder of a non-profit that developed open-source epidemiology simulation software used by the World Health Organization. My strength is rapidly deploying observable, impactful models that drive key business decisions.

EXPERIENCE

Machine Learning Engineer — Spatialedge

Jun 2021 – Present

- Served as Technical Lead Engineer on two enterprise data applications providing optimized results in retail and financial sectors
 - Mentored junior engineers and provided technical guidance while engineering the technical foundation for both projects
 - Productionized and contributed to 8 machine learning models including Lead Time Forecasting, Demand Forecasting, and Interbranch Transfers Optimization
 - Developed Workforce Planning Optimization and Cash Replenishment Forecasting applications using React, TypeScript, GraphQL frontends with Ruby/PostgreSQL backends
 - Implemented CI/CD pipelines using GitLab and GCP with Terraform for infrastructure automation
-

SKILLS

Languages & Frameworks: Python, C++, SQL, JavaScript, TypeScript, Ruby, Bash, C

ML & Data Science: PyTorch, Scikit-Learn, TensorFlow, Time Series Forecasting, Machine Learning, Computer Vision

Infrastructure & DevOps: GCP, Docker, Kubernetes, Terraform, CI/CD, Airflow, Dagster, Helm, Git, Linux

Databases & Systems: PostgreSQL, BigQuery, Redis, CUDA, GraphQL, Crow API

EDUCATION

ESIEE PARIS — Master's of Science in Computer Science

2021

Pearson Institute — Bachelor's of Science in Information Technology

2018

PROJECTS

VISS (Viral Infection Simulation Subsystem)

github.com/twigglits/viss

- Engineered first open-source Viral Infection Simulation Subsystem providing valuable insights to the World Health Organization
- Implemented backend using Redis DB, C++, and Crow API with CUDA acceleration for high-performance epidemiological modeling
- Developed modular frontend using React and TypeScript with CSS Tailwind for interactive simulation visualization

Spatialedge Analytics DF Auditor

pypi.org/project/spatialedge-analytics-dfauditor

- Created DataFrame auditing and validation tools for machine learning pipeline quality assurance
- Implemented automated testing framework ensuring data integrity across multiple client projects
- Published Python package to PyPI for broader community use in data science workflows
